PROFESSIONAL SUMMARY

Programmer Analyst with a B.S. in Computer Science (cum laude). Builds internal applications, automation and reports in a regulated financial environment, investigates and resolves production issues with vendors and internal teams, and has supported public-sector IT infrastructure. Previously led student teams on full-stack and mobile projects using Agile practices.

WORK EXPERIENCE

Programmer Analyst March 2026 – Present
First Citizens Bank, Trinidad and Tobago

- Develop internal applications and automation that streamline business processes, using Python and SQL.
- Built and maintain 15+ reports and dashboards (Crystal Reports, Power BI) for internal business units and external clients.
- Investigate production issues with vendors and internal teams; coordinate, test and verify fixes across multiple sites.
- Update systems to meet industry compliance requirements; gather requirements, run testing and coordinate delivery with other teams.

Associate Professional (IT Support Technician) August 2025 – March 2026
The Integrity Commission of Trinidad and Tobago

- Supported IT infrastructure for a government organization: Active Directory, server administration, firewall management, PC deployment and technical support.
- Contributed to process automation, managed the WordPress website, and supported the rollout of a digital platform for online submissions and case management.

Resident Assistant & Peer Tutor (Computer Science) August 2023 – May 2025
Florida Institute of Technology

- Mentored 70+ residents through crisis response and conflict mediation; tutored 30+ peers in data structures, algorithms and OOP.

PROJECTS

Team Lead, PantherFIT (React Native Mobile App) August 2024 – May 2025
Florida Institute of Technology

- Led a React Native fitness app with Google OAuth, REST API integrations, SQL-backed workout logging, live gym traffic estimates (BestTime API) and a badge system; managed Agile sprints and contributed to frontend and backend.

Developer, Google Apps Script Automation Tools August 2023 – May 2025
Residence Life, Florida Institute of Technology

- Built and deployed automation scripts for calendar invites and event management, saving the department 20+ staff hours annually.

Team Lead, SpotStats (Spotify Statistics Web App) Spring 2021
University of the West Indies, St. Augustine

- Directed a 5-person team building a full-stack web app with REST APIs and data visualization; coordinated version control via GitHub.

SKILLS

- **Languages:** Java, C++, C, Python, SQL, JavaScript, TypeScript
- **Web & Mobile:** HTML, CSS, React, React Native, REST APIs
- **Databases & Reporting:** SQL, IBM Informix, Oracle DB, MongoDB, DynamoDB, Crystal Reports, Power BI
- **Cloud & Tools:** AWS (EC2, S3, DynamoDB), Git, Agile/Scrum, Active Directory, server administration, WordPress

EDUCATION

Florida Institute of Technology, Melbourne, FL August 2022 – May 2025
Bachelor of Science, Computer Science *(cum laude)*, GPA 3.6/4.0 *(Transferred from University of The West Indies, St. Augustine – GPA 4.21/4.3)*

HONORS & AWARDS

- Upsilon Pi Epsilon – International CS Honor Society
- Advanced Level Mathematics Scholarship (Open) – Government of Trinidad and Tobago, 2020
- Dean's List – University of the West Indies (Fall 2020, Spring 2021); Florida Institute of Technology (Fall 2022 – Spring 2025)
